Monthly Indicators

May 2022

After two years of record-setting activity, there are signs the housing market might be cooling. High home prices and a surge in mortgage interest rates are slowing buyer activity, with home sales declining for the third consecutive month under the weight of soaring homeownership costs. The National Association of REALTORS® (NAR) reports existing home sales were down 2.4% from the previous month, while pending sales fell 3.9% as of last measure, extending the trend of recent months. Economists predict sales will continue to soften in the near future, which may put downward pressure on home prices.

New Listings were down 6.6 percent to 198. Pending Sales decreased 1.7 percent to 170. Inventory shrank 25.9 percent to 238 units.

Prices moved lower as the Median Sales Price was down 3.1 percent to \$155,000. Days on Market decreased 2.1 percent to 47 days. Months Supply of Inventory was down 19.0 percent to 1.7 months.

The slowdown in sales has provided a much-needed lift to housing supply, with inventory up 10.8% from the previous month according to NAR, although supply remains down 10.4% compared to this time last year, with only 2.2 months' supply of homes at the current sales pace. As the nation continues to explore ways to solve the ongoing housing shortage, estimated at 5.5 million homes, the Biden administration recently unveiled the Housing Supply Action Plan, which aims to expand housing access through a number of administrative and legislative actions and help relieve the nation's housing crisis over the next 5 years.
